ANNOUNCEMENT

IGS (India), the Indian Chapter of International Geosynthetic Society is pleased to announce a Conference on “Geosynthetics in Water Resources and Hydraulic Structures”, scheduled to take place on 30-31 July 2026, Conference Hall, CBIP Building, New Delhi.

Efficient management and conservation of water resources are critical to sustainable development and remain a key national priority. Geosynthetics have emerged as innovative and cost-effective solutions for enhancing the performance, durability, and sustainability of irrigation systems, reservoirs, dams, canals, and other hydraulic structures. The conference will provide a platform for engineers, researchers, policymakers, and industry professionals to exchange knowledge, share practical experiences, and discuss the latest advancements in geosynthetic applications for water resources infrastructure.

The conference will cover topics including canal lining and seepage control, reservoir and dam applications, waste containment systems, geomembranes and geotextiles and case studies from irrigation and hydraulic engineering projects.

KEY TOPICS : The topics to be covered (but not limited to) the following :

- Canal lining and seepage control
- Reservoir and dam applications
- Waste containment systems
- Geomembranes and geotextiles
- Case studies in irrigation projects

EXPETED TAKEAWAYS

- Improved water-use efficiency through effective seepage control and water conservation measures.
- Enhanced performance and longevity of hydraulic structures through the application of geosynthetics.
- Cost-effective and sustainable solutions for water resources infrastructure.
- Exposure to best practices, innovative technologies and successful project case studies from India and abroad.
- Networking opportunities with leading experts, practitioners, policymakers and industry stakeholders.

WHO SHOULD ATTEND

- Engineers, geotechnical professionals, and researchers involved in the planning, design, construction, operation and maintenance of water resources and hydraulic infrastructure.
- Professionals from irrigation, dam, reservoir, canal, river management and environmental engineering sectors.
- Policymakers, regulators, and government officials engaged in water resource management and sustainable infrastructure development.
- Consultants, contractors, project managers, and technology providers working in infrastructure and construction projects.
- Academicians, students, and research scholars interested in geosynthetics, geotechnical engineering, and sustainable water management practices.
- Representatives from public and private sector organizations involved in irrigation, water conservation, and hydraulic engineering projects.

CALL FOR PAPER / PRESENTATION

The Technical Presentation on the topics proposed and allied topics are invited. Intending authors may send the Technical Presentation, (25 minutes slot), through e-mail only at contact@geosyntheticsindia.org latest by **25th July 2026**, with prior intimation of the topic of presentation.

DATES & VENUE
